

# Transforming Your Technical Workforce

Industry-Leading Safety, Health, Regulatory, and Technical Training

Highly technical organizations operate in a fast-paced and increasingly globalized business landscape. Leading companies focus on improving human performance, reducing errors, and leveraging best-in-class technologies that support their talent-management programs. GPiLEARN+™ is an online technical training program that provides a comprehensive solution to achieve your workforce performance goals. It can be hosted on your LMS or LXP, or on our ready-to-go LMS solution.

## Elevate Technical Skills and Performance

As a leading technical training partner, we understand the importance of training your team in technical skills and theory, and of being up-to-date and compliant with industry standards.

Drawing upon our deep experience in learning delivery, GPiLEARN+ can be fully implemented—with its robust technical theory, skills, safety, and compliance training content—in just a few weeks, delivering ultra-fast time to value with immediate results.

Our industry-leading online training solution helps you implement blended learning programs that make a lasting impact on your engineers, technicians, operators, and other skilled workers. From health, safety, and environmental programs to complex position-based qualifications, GPiLEARN+ supports you in maintaining a safe and effective technical workforce.

Our online courseware features a range of topics that cover areas of corporate compliance, worker safety, and technical expertise. With training that follows industry-recognized trends, our lessons capture more complex or advanced concepts and include iterative knowledge checks to reinforce learning.

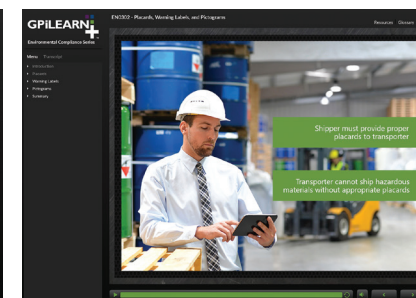

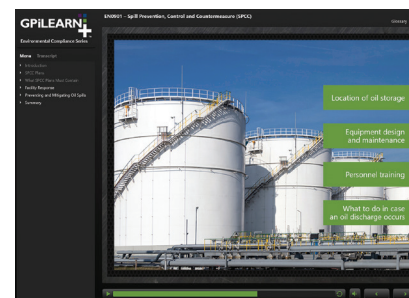

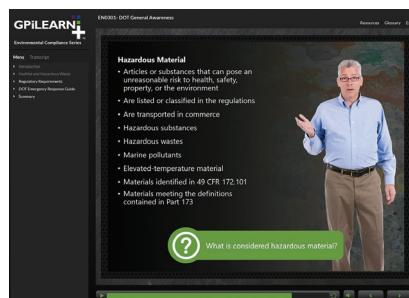

Safety is paramount for technical organizations. Our **NERC\***-approved compliance training promotes electric reliability, while our **OSHA Regulatory Compliance** series provides modern, engaging eLearning content that can be deployed on your existing learning platform or our LMS. With over 25 critical OSHA topic areas covered, such as fall protection and electrical safety, this content series allows your company to meet regulatory compliance training requirements in a flexible and cost-effective manner, while driving a culture of safety within your organization.

\*NERC: North American Electric Reliability Corporation

GPiLEARN+ offers courses for every level of user experience, including training for maintenance technicians, electrical technicians, and instrument and control technicians. It also covers topics like renewables, gas turbines, math and sciences, power plant operations, and more.

## Online Content

Having relevant, interactive, and compelling content is critical when selecting a learning platform. GPiLEARN+ provides an extensive library of proven content supported by subject matter expertise.

## A Full Suite of Training for Technical Professionals

With GPiLEARN+, your workforce can access the latest comprehensive training for their specific roles. Our programs are designed to cover the fundamentals of their trades, as well as essential health and safety skills, standards, and best practices.

Keep your organization running at its best. Give your team the competitive edge with GP Strategies and GPiLEARN+ today!
